EDUCATION

B.Tech in Computer Science and Engineering

Future Institute of Engineering and Management

08/2018 - 08/2022

CGPA 8.43

Higher Secondary

Thakuranichak Union High School

03/2016 - 05/2018

Marks Obtained 65%

SKILLS

React.js

JavaScript

TypeScript

Git

HTML

CSS

Tailwind CSS

Vite

React Bootstrap

PERSONAL PROJECTS

React Shopping Cart

- Developed a feature-rich React shopping cart website with advanced functionalities, leveraging the Context API for seamless cart manipulation. Empowered users to effortlessly add products, manage their cart, and apply dynamic price and rating filters for optimal shopping experiences. Utilized React's modular structure to create a responsive and visually appealing interface.

- Live Site** - <https://shop-cart-pro.netlify.app/>

Personal Portfolio Website

- Built a dynamic personal portfolio website using React.js, showcasing my projects, skills, and achievements. Designed an intuitive UI for easy navigation and engaging user experience. Highlighted my work through interactive components, including project showcases and skill visualizations. Implemented responsive design for seamless browsing on various devices.

Weather App

- In this project, I created a React weather app using an API from Open-Weather-Map to get weather information worldwide. By default, it displays the local weather at Arambagh. You can also search to find the current weather in a city, for example, Mumbai or Delhi. The app displays the local temperature, gives you a brief description, and also shows an icon based on the weather.
